

The Transforming Role of the Perioperative Nurse

Norwegian Bliss

27th October – 3rd November 2019

7 Night Mexican Riviera Cruise

The Program:

The full program is still to be finalised however we can assure you that it will be provided by expert Nurse Educators with extensive clinical and education experience. The education content provided in this program meets the same exacting standards as anything offered in an Australian land-based program. What we have done is marry best practice content with a cruise ship holiday to provide you with a Travel CPD experience, where the conference content is as important as your need for rest and relaxation. We have taken a holistic approach to Nursing continuing professional development to ensure you get the most out of the education experience.

Created by Nurses, for Nurses.
