

# 30 CPD HOURS

## *A Conference Snapshot*

### Synopsis

This conference will focus on the issue's women face in our society including violence, conflict, poverty, discrimination, and other social, psychological, and biological factors – that impact the health of the individual and the delivery of health care to women.

The discussion will be framed in the Australian context and explore how these public health issues impact a woman's experience of health services in both the community and hospital setting. The Australian refugee experience will be included. As will the Vietnamese experience – this population ranks 6th in the top ten countries of birth for the overseas born population of Australia.

This conference will be of interest to Health Care Professionals who provide services to female clients. To gain a better understanding of the female experience in society.
